

GREATER PITTSBURGH AIRPORT

Crowning jewel of Greater Pittsburgh is the ultra-modern terminal building. The seven story terminal is a masterpiece of planning functional architecture, from the Canadian black granite outside columns and Missouri buff marble interior, to the revolutionary "finger dock" system of design. The main East-West instrument runway, largest of three, extends 8000 feet to handle the fastest jets and long-range bombers. The observation decks accommodate 10,000 people.
